Processing of personal data:

We will only process personal data that we need to fulfill the jump operation if the jumper provides it to us at the beginning of their participation in the jump operation or if it is collected during the course of their participation in the jump operation. The data will be retained for at least three years after the end of their participation in the jump operation for the purpose of documenting their participation in the jump operation before being deleted. The use of the data includes, among other things, communication with the jumper during their participation in the jump operation, the documentation of their participation in the jump operation, and the communication of information relevant to sports or operations. Data will generally only be passed on to third parties for the purpose of conducting the jump operation, e.g., to the German Parachute Sports Association (DFS), for example, to report an incident, and to cooperation partners and service providers directly involved in the jump operation. The jumper is aware that images may be taken during their stay at the drop zone in which the jumper is recognizable. This imagery will be used by Skyfactory Stadtlohn for advertising purposes on its website, in print media, and in social media. The jumper has the right to assert his or her rights under existing European Union law at any time. Further information on data protection is available at the following link: <https://www.skyfactory-stadtlohn.de/datenschutz/>

I expressly release the drop zone from any liability that may arise from the operation of my parachute.
